

GMTK Game Jam 2024 [Built to Scale]

Finished ✓

- hydrogen is colorless (rainbow?)
- bond breaks = effect based on combination
 - always explodes
- bonds form when you pair

UI

- level system
- puzzles
o preset atoms?

Ingame Recipe Book

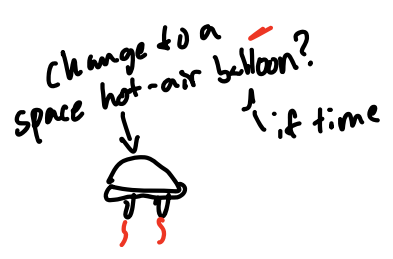

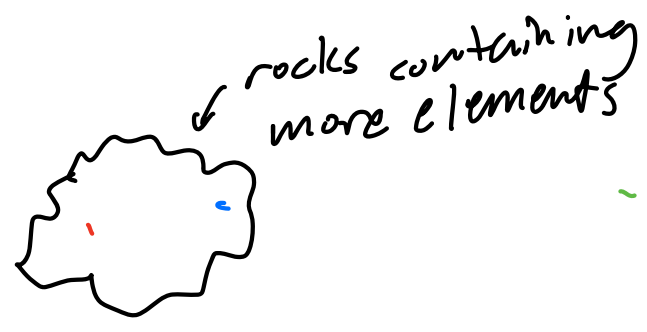

- gas source: helium ✓
- explosive source: CH_4 (methane) for rocks (instant) ✓
 - OnTrigger radius explosion
- platform: H_2O (water) ✓
- boost: O_2 (oxygen gas) ✓
- CD preventer: NH_3

- collect elements (randomly spawn) to make voyage to exit
- "progressively scale up to exit"
- "scale element collection"

goal (exit)

fuel: 

CD Layer (toxic) (carbon monoxide)
• causes fuel leak
• prevent with ammonia (NH_3)

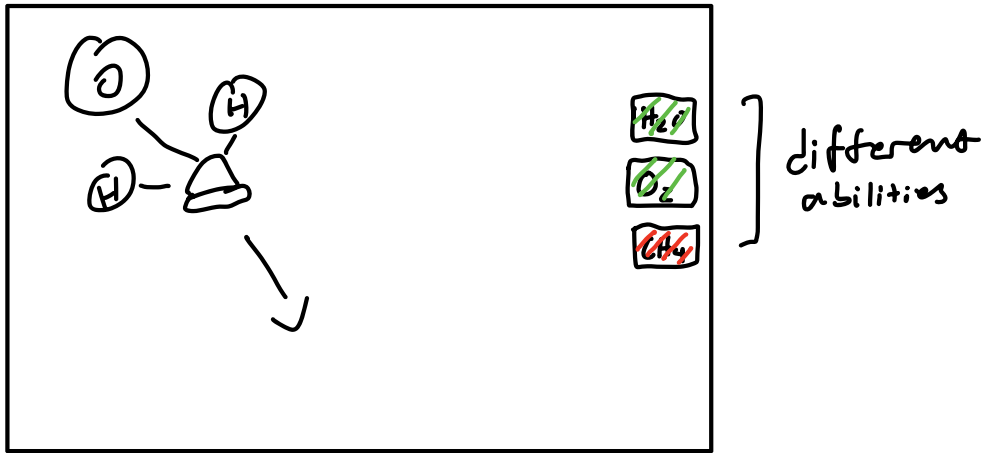

elements

spawn

• not used (scrapped)

used idea

- H_2O makes water platforms
 - allows for break/collection of minerals atoms w/o using fuel
- water bear chases you, survive as long as possible
 - it grows in size overtime (scales)
- collect atoms to run
 - water bear can destroy them to reach you ~ on contact
